

PRESS RELEASE - 1 OCTOBER 2012

Agreement between Green Motion and ECOHZ

Lausanne, October 1, 2012 - With a view to responsible growth Green Motion, Swiss leader in charging infrastructure for electric vehicles, has agreed with the Norwegian company ECOHZ to provide renewable electricity certificates to its customers. All Green Motion charging stations will now be sold with Guarantees of Origin certificates from ECOHZ corresponding to the stations potential of annual electricity consumption.

The origin of the power is a sensitive topic in the field of e-mobility, Green Motion of Lausanne wishes to assume its responsibilities as provider of charging infrastructure, and work with the European leader for documented renewable power (Guarantees of Origin), the Norwegian company ECOHZ.

All Green Motion charging stations will now be sold with a quantity of Guarantees of Origin certificates, supplied by ECOHZ, corresponding to the potential consumption of the charging equipment.

Green Motion customers pay for this assurance as part of a package calculated on the basis of the consumption potential of their type of charging station. This amount will be included in the annual license fee of the terminals.

The package will be renewed annually guaranteeing that each year of the operational life of the terminal renewable electricity is supplied to the vehicles using the charging terminal.

Existing customers of Green Motion will be offered to include Guarantees of Origin certificates to their original terminals from 1 January 2013.

About ECOHZ

ECOHZ is a Norwegian-based company with offices in Oslo and Geneva. Its primary business is to offer Guarantees of Origin from renewable energy to electricity providers, businesses and organisations across Europe, with distribution partners in 12 European countries.

ECOHZ provide various customer services which fit the larger context of renewable energy consumption and sustainability strategies.

ECOHZ's portfolio includes renewable electricity from hydropower, wind power and biomass, generated by more than 200 power plants. A large number of the power producers are located in Norway. In 2011, ECOHZ managed a renewable energy portfolio of more than 47 TWh, making the company one of Europe's largest independent suppliers.

ECOHZ confirms that power companies invest revenues generated from Guarantees of Origin in new renewable energy production. The routines for documentation have been verified by Det NorskeVeritas (DNV) and the auditing companies of selected ECOHZ partners.

About Green Motion

Green Motion is an independent company founded in Lausanne January 2009 that designs, produces and distributes charging systems for electric vehicles.

The Swiss company has for more than three years been a pioneer in the market for charging infrastructure and installs its terminals in Europe.

Green Motion's founders are convinced that the success of electric vehicles is strongly linked to the development of an efficient network of charging. This is why networking charging stations remains a priority for Green Motion and its major asset, thanks to its software.

The Green Motion product range is designed for individuals, public authorities, companies and electricity suppliers.

In 2012, Green Motion is present in Switzerland, England and France.
